# SRI Varahi ENGINEERING WORKS

INTRODUCING

## Laser Cutting Up to 45mm

95021 93424

12KW MAX FIBER

# Laser Cutting

SS Sheet 0.8mm To 25mm

MS Sheet 0.8mm To 45mm

# Metal Sheet Bending

HYDRAULIC

Large sheet metal bending machines are semi-automatic numerical control, which improves the accuracy and speed of large sheet metal bending machines to a certain extent, and also brings some special functions that can greatly improve work efficiency, such as automatic avoidance, molds Library, single step cycle, direct angle calculation, the accuracy can reach 0.05mm, and the torsion axis numerical control mold is also more demanding than the ordinary aluminum bar and sheet metal bending machine, and the machine frame processing demand is higher.

STAINLESS STEEL

# Medical And Lab Equipments

MILD STEEL (M.S)

# Lockers, Stalls And Tables

LASER & CNC

# Cutting
